**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1,4,6,10,13,14,and 20 the 'preferably' or 'particularly' clauses are indefinite as it is not clear what is being positively claimed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5,15,22 are rejected under 35 U.S.C. 102(b) as being anticipated by either Wagner or the German '752 publication (German). Both Wagner and German show intermeshing rolls cutting or shredding containers fed thereto by van type feeding means.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-14,16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Wagner or German. The limitations of these claims would have been

obvious design choices only once the basic apparatus was known. For example, the use of sensors is well known in the shredding art and of no patentable merit. Also, the 'cutting play' would depend on several factors such as material being treated and desired end results. The shape of the feed means would also have been obvious once the feed means of the prior art was known.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
